35 ft gates and wider come with gussets and guy wire over the (2) 8"/10" beams to prevent sagging

For Holding Pens longer than 75 ft add \$35/ft - covers air-hose support cable; A-2060 #60 roller chain; Triple Coiled Polyurethane Hoses; Control Hose Harness, etc.

4" Channel not included

We are still testing and evaluating Manure Scrapers for Gates wider than 46 ft

Gates up to 27 ft wide ship by Commercial freight. Larger gates need to go by dedicated truck @ maybe \$4.85/mile. We prefer you make your own trucking arrangements.

For Holding Pens longer than 75 ft add \$35/ft - covers air-hose support cable; A-2060 or #80 roller chain; Triple Coiled Polyurethane Hoses; Control Hose Harness, etc.

Electrically-Driven HERITAGE Gates

- These gates are driven by either 1 1/2, 2 or 3 hp 3-phase motors.
 - They are controlled by a single toggle switch via a Variable Speed Drive (aka Frequency Controllers).
FreqController converts single phase to 3-phase
 - Main Carriages are identical to our heavy duty air-driven gates.
 - Gates do not lift, though lift cylinders are optionally available as a custom-built gate - Request quote.
 - Instead they come with either sliding or swinging gates for the cows to get to the front of the Holding Pen
 - Swinging gates can swing either from the sides or from the center of the gate.
 - If your cows enter the holding pen from the side, no swinging or sliding gates are required. Cows enter H.P. in front of gate. Subtract \$950 from any price shown, sliding gates add \$750 per sliding gate I.E. 2 slides add \$1,500
- 4" Channel not included**
