Electrically-Driven HERITAGE Gates

(Not available with Manure Scrapers)

- These gates are driven by either 1 1/2 or 2 hp 3-phase motors.
- They are controlled by a single toggle switch via a Variable Speed Drive (aka Frequency Controllers).
FreqController converts single phase to 3-phase
- Main Carriage is identical to our air-driven gates.
- Gates do not lift.
- Instead they come with either sliding or swinging gates for the cows to get to the front of the Holding Pen
- Swinging gates can swing either from the sides or from the center or one gate from the center and the other from one of the sides, depending on where your cows are coming from.
- If your cows enter the holding pen from the side, no swinging or sliding gates are required. Subtract \$850 from any price shown
